// SUMMARY

Technically grounded infrastructure leader who develops capable teams, directs secure enterprise transformation, and connects architecture, operational resilience and controls to measurable business value. Leads the global infrastructure team at Tilray Brands, a regulated multinational that grows by acquisition: integrating what it acquires, retiring what it no longer needs, and running 50+ SOX IT general controls (ITGCs).

// CORE CAPABILITIES

Architecture & transformation	10 acquired organizations integrated in 12 months; VM estate reduced by $\sim\frac{2}{3}$; CAF landing zones
Infrastructure security	CIS-aligned hardening, segmentation and firm-wide next-generation firewalls
Controls & assurance	50+ SOX ITGCs operated; GMP system validation; NIST SP 800-53 / 800-82
Resilience	Business impact analyses; RPO/RTO attestations; 160 staff remote in 48 hours
Engineering leadership	Team of 6–10 engineers and cloud consultants; owns the IaC practice

// PROFESSIONAL EXPERIENCE

IT Infrastructure Manager

Jul 2023 – Present

Tilray Brands Inc. · Toronto, ON

Lead a distributed team of 6–10 (FTEs and cloud consultants) supporting production facilities, brew pubs and offices across North America and Europe; own the infrastructure SOX ITGC portfolio; direct acquisition-integration and cloud-consolidation strategy.

- Led infrastructure integration for 10 acquired organizations within 12 months, including full system and network takeovers of 4 production facilities from AB InBev in 90 days and 6 Molson Coors transitions in 60 days, contributing to Tilray Beverages' growth into the #4 U.S. craft brewer.
- Completed 6 Microsoft Entra tenant-to-tenant migrations, bringing 900+ employees and their data onto one governed identity platform.
- Run and maintain 50+ SOX ITGCs across the infrastructure function; spearhead IT's Good Manufacturing Practice (GMP) compliance work for a business unit expanding internationally: system validation, ITGCs and RPO/RTO attestations for lab equipment and software and one facility's ERP (in progress).
- Led a legacy rationalization program that reduced the virtual-machine estate to roughly one-third of its earlier size, and secured leadership support to sunset legacy platforms, delivering a six-figure annual OPEX reduction.
- Led a Microsoft Cloud Adoption Framework (CAF) program establishing governed Azure landing zones and a zone-redundant Cisco Meraki SD-WAN hub in Azure; now developing a phased consolidation strategy for an acquired Azure/AWS environment (enduring landing zone, BGP cutovers, staged transitions), targeting a substantial six-figure annual OPEX reduction. Underway.
- Brought business stakeholders together to run business impact analyses (BIAs); serve in the core leadership group where continuity and technical disaster recovery intersect, using NIST SP 800-53 / 800-82 to frame risk and measure progress.
- Lead 6–10 engineers, architects and cloud consultants who own migration plans, execution and playbooks (ERP, network and tenant migrations, AWS-to-Azure application moves, Azure App Service ecommerce integrations). My team owns the infrastructure as code, including an Azure Virtual Desktop (AVD) build in Bicep, delivered jointly with network engineering, infosec and cloud architecture; I balance sprint capacity against a 100+-project portfolio.

Information Technology Manager

Jan 2019 – Feb 2023

Baker Tilly KDN LLP · Courtice, ON

Matured the security program of a professional services firm and rebuilt its core identity and network estate.

- Moved 160 employees to remote work in 48 hours; co-authored the COVID-19 technical strategy with the COO.
- Designed, built and deployed a new Active Directory + O365 environment enabling full remote connectivity in under 10 months; reimaged 300 endpoints and 50 servers across three 48-hour maintenance windows.
- Established CIS maturity (application whitelisting, network segmentation, cloud IAM) and oversaw a Palo Alto next-generation firewall (NGFW) rollout across all firm locations, replacing end-of-life equipment.
- Built core security processes: phish-alert reporting, incident management, threat hunting, patching cycles and coordinated incident response.
- Led IT due diligence as M&A technology advisor for the Collins Barrow Kawarths & Durham consolidation.

IT Systems Administrator

Nov 2017 – Jan 2019

Collins Barrow Durham LLP · Courtice, ON

- Built IT asset inventory, process documentation and cost models to satisfy merger due-diligence requirements.
- Virtualized all on-prem physical servers to Hyper-V 2016, improving scalability and disaster-recovery readiness.
- Migrated Exchange 2010 email to Office 365; standardized GPO and Windows 10 / Server 2016 hardening baselines.

IT Systems Technical Consultant

May 2016 – Nov 2017

Complete Sentient Information Systems · Oshawa, ON

- Delivered IT modernization for legal, CPA and small-business clients: AD and Exchange migrations, Hyper-V virtualization, Server / Exchange 2016 and Office 365 adoption.
- Held retained weekly sysadmin roles for multiple organizations of 20–100 users, with security auditing and documented administrative procedures.

IT Consultant

Apr 2010 – Sep 2014

Bogart & Daugherty Consulting · Sarasota, FL

- Ran IT for legal and CPA practices as a fractional IT department: supported and migrated Small Business Server, Windows Server, Exchange, BlackBerry and AD estates behind WatchGuard / SonicWall perimeters.
- Administered 30+ legal and practice-management applications (ProLaw, Worldox, Amicus Attorney, Juris, Aderant, NetDocs) plus cost-recovery and VoIP systems.
- Advised senior decision-makers, including two former U.S. Senators, high-profile attorneys and CEOs, on IT strategy and managed service provider (MSP) models; owned MSP escalation management.

Contracted Systems Support Analyst

Jan 2009 – Apr 2010

Sarasotasupport.com — Computer Assist · Sarasota, FL

Provided contracted desktop-to-server support and legal-software administration for small professional practices, administering Windows Small Business Server 2003, Active Directory and Exchange 2007 end to end.

// CERTIFICATIONS & EDUCATION

CISSP — Certified Information Systems Security Professional · (ISC)² · Issued Jun 2023

CISM — Certified Information Security Manager · ISACA · Issued Jun 2024

Coursework in Computer Engineering — University of South Florida, Tampa, FL

Coursework in Network Engineering & Windows Server Administration — State College of Florida, Bradenton, FL

// TECHNICAL SKILLS

Cloud & identity: Microsoft Azure, AWS, Entra ID, Microsoft 365, Azure Virtual Desktop, Azure App Service, Azure Arc, Okta, Duo

Infrastructure & network: Active Directory, Hyper-V, VMware, Cisco Meraki, BGP, Exchange, ServiceNow

Security & assurance: Palo Alto NGFW, Microsoft Defender, Microsoft Sentinel, SOX ITGC, NIST SP 800-53, NIST SP 800-82, CIS Controls, Zero Trust

Code & automation: Bicep, Terraform, PowerShell, KQL, Python, SQL, GitHub Actions
